

Double Mechanical Pipe Plug

The Double Mechanical Pipe Plug is designed for testing or blocking at a "Y" connection. The flexible spring between the two rubber seals allows the plug to enter the Y connection quick and easy. This plug can be used as a "long term" seal where a pneumatic plug should not be used. The 3" and 4" models have separate handles to control each seal so water can be released before removing the plug completely.

Product Code	Product Description	Qty/ Case
83668	2" X 12" Double Mechanical Plug	1
83669	3" X 12" Double Mechanical Plug	1
83636	3" X 24" Double Mechanical Plug	1
83638	3" X 48" Double Mechanical Plug	1
83640	3" X 72" Double Mechanical Plug	1
83670	4" X 12" Double Mechanical Plug	1
83637	4" X 24" Double Mechanical Plug	1
83639	4" X 48" Double Mechanical Plug	1
83641	4" X 72" Double Mechanical Plug	1

Other sizes available upon request

- Can be used for water or air testing
- Natural Rubber elements with rings for positive sealing ability
- Plated steel parts for corrosion resistance
- Distinctive orange color for visibility
- Flexible spring steel center sections for strength and long life
- Easy to read pipe sizes molded on each rubber seal
